"We Just Need To See The Big Picture…"

Lt. Kinderman : You go to films, Father Dyer? You like them?
Father Dyer : Oh, sure.
Lt. Kinderman : I get passes. In fact I've got a pass for the Crest tomorrow night. You would like to go?
Father Dyer : What's playing?
Lt. Kinderman : "Wuthering Heights".
Father Dyer : Who's in it?
Lt. Kinderman : Heathcliff, Jackie Gleason, and in the role of Catherine Earnshaw, Lucille Ball. You are happy?
Father Dyer : I've seen it.
Lt. Kinderman : Another one.

From the picture: The Exorcist   Director / Writer / Producer : William Friedkin

For those who love the big picture, who are in to story telling, aren't we all falling in love with the pictures.

Where ever you wanna watch: on your home sound system, on a smart devices, in bed, in the train,In the cinema house,

in de Drijfin or drive-ins.

When there is a need to re-engage with what we do, On a fundamental level, Pictures Are The Big Picture!

But who is behind the pictures? How they connect?

Do they link and if yes, why end when?   let's find out Where am I in this picture?

It Is All A Very Big Matrix

MoviesDatabase provides complete and updated data for over 9 million titles
(movies, series and episodes) and 11 million actors / crew and cast members
 https://rapidapi.com/SAdrian/api/moviesdatabase/
                                        Popularity : 9.9 / 10
Service Level: 100%

MDB Api will help me to help you in search of your favoriet
actors, directors, what ever they done before this movie and after.
It will be possible to search by name en by titel by keywords and in categories.

Keanu Reeves/ Matrix/
Lana Wachowski / Matrix
Lilly Wachowski/ Matrix

By building a search experience around movies,
which means that users may want to search and display movie titles, and cast members.
One can not search by image but the pages will serve you images.
The Big Picture search engine will provide a login environment with visitors' passwords .
Search on 2 categories save the data locally (maybe with the help of cookies)

1.Visitors environment for everyone
2. Login - members environment password name and email. If the member is logged in she can have access to the stored data (names of films and names of crow or cast)
From post search.
3. Via her stored data she can keep looking for names of movies by categories (need to test the api for final idee)
4. Search criteria: Titles by Keyword / Titles by Title / Cast /

I would like to use novi backend, maybe VDX from Lieden.

Thank you,
